ETIBOX Distribution Boards DIDO

Home distribution board DIDO-E

Rated current
63 A

Rated voltage
400 V

Degree of protection
IP 40

Included special marking stickers with symbols most common for home installations

N/PE terminals assure fast and simple wiring.

Possibility to add key lock to prevent unauthorized access.

Easy mounting system

- Standard set includes:
- metal DIN rail TH35 mounted in enclosure
 - PE/N terminals
 - mounting set with screws
 - marking stickers with symbols
 - cover for empty modular spaces

Home distribution boards DIDO-E are available in two types: surface mounted and flush mounted boards, in one, two or three row design. Available with transparent or white doors. With lock set installation the board can be locked. Home distribution boards can easily be built in and already have a DIN rail installed for easier and quicker mounting of module devices.

Terminal blocks for PE and N conductors are attached as standard for all distribution boards. Distribution boards correspond to condition of insulation protection and are in accordance with standard IEC60670-24.

Technical data

Degree of protection	IP 40*
Colour	white
Double insulation	<input type="checkbox"/>
Standard	IEC 62208, IEC 60670-1, IEC 60670-24
Installation temperature	-25° / +60°C
Glow wire test	650°C

*IP 30 for EC 1+1, 3+1, 3+2, ECGxxMEDIA

Number of N - PE terminals (1,5...16mm²):

ECT/ECM4PT/PO	2x4 4 PE / 4 N
ECT/M8PT/PO	2x8 8 PE / 8 N
ECT/M12PT/PO	2x10 10 PE / 10 N
ECT/M18PT/PO	2x13 13 PE / 13 N
ECT/M24PT/PO	2x13 13 PE / 13 N
ECT/M36PT/PO	2x15 15 PE / 15 N
ECT/M48PT/PO	2x20 20 PE / 20 N
ECT/M 2x18PT/PO	2x15 15 PE / 15 N
ECT/M 3x18PT/PO	2x25 25 PE / 25 N
ECT 4x18PT/PO	2x30 30 PE / 30 N
ECT/M1x24PT/PO	2x13 13 PE / 13 N
EC 1+1	-
EC 3+1	-
EC 3+2	2x4 4 PE / 4 N

- ECG14, ECG28, ECG42 have 1 additional free space to build in an extra PST-UNI terminal.
 - ECG56 and ECG70 have no extra space for PST-UNI terminals.
 - Double insulation not valid for ECG MEDIA

Flush mounted enclosures with super thin design (metal or plastic door) DIDO ECG

Included mounting set for all kind of walls.

Front mask sealing possibility

Special hinge system provides left or right door opening.

Standard set includes:
- metal DIN rail TH35
- PE/N terminals
- mounting set with screws for all kinds of walls (concrete, hollow, wooden...)
- marking stickers with symbols
- cover for empty modular spaces

Possible to add key lock

N/PE terminals included

Marking sticker with symbols

Possible to mechanically connect two ECG enclosures side by side with special metal bracket.

Description

DIDO ECG are flush-mounted compact distribution boxes. They are suitable for installation in homes, schools and commercial buildings.

Main characteristics:

- // Class II, double insulated
- // Cable entrance from top or bottom
- // Device cover with opening for 12 modules per row + 2 blended (can be removed). Can be sealed
- // Thin design, 88mm depth in wall and 7mm outside the wall.
- // Color: White RAL 9003 with allowed difference $\Delta E = 2,15$

Enclosures are completely assembled with all necessary parts, such as:

- // DIN rail
- // Insulated terminals, neutral and ground
- // Covers for free space
- // Needed installation accessories for concrete and hollow walls
- // Instruction manual

Distribution Boards DIDO ACT

ACT distribution boards can be used in applications with wall mounted electrical installations, like containers, wooden houses. Blended cuttings on top and bottom of enclosure for entrance of various dimensions of installation channel.

Enclosures are completely assembled with all necessary parts, such as:

- // DIN rail
- // Insulated terminals, neutral and ground
- // Covers for free space
- // Needed installation accessories
- // Instruction manual

Modular Distribution Boards For Use Outside DIDO-ECH

Rated current
63 A

Rated voltage
400V AC/ 1500V DC

Degree of protection
IP 65

Left or right door opening

Prepared points for glands (cable entry)

Possible to seal enclosure, to prevent unauthorized access.

- Standard set includes:
- metal DIN rail TH35
 - PE/N terminals
 - mounting set with screws
 - marking stickers with symbols
 - covers for mounting holes
 - cover for empty modular spaces

- Tight closing with rubber between door and housing provide IP65. Also possible to install key lock

Watertight wall-mounted distribution boards apply in domestic and industry architecture for mounting modular equipment for protection (IP65) against wet, dust and another dirtiness. Enclosure is made of high thermal stability material - ASA (Acrylonitrile-Acrylic-Styrene), plastic with good dielectrical and mechanical attributes, UV resistant (colour stability). Easy and quick montage.

Main elements:

- // Bottom cover with DIN rail, PE and N bars and holes for PG cable inlets properly marked
- // Top cover with seal of the door
- // Transparent door made of polycarbonate (PC) with plastic lock (in standard) or metal lock with key (in option)

Technical data

* PST-UNI is an extra insulating terminal (2 x 15) that can be mounted into 12, 24, 28, 36, 42, 48 and 56 module distribution boards

Metal Distribution Board DIDO MB

The DIDO MB series metal distribution boxes are designed to provide reliable and safe electrical distribution in residential and commercial installations. They are suitable for in-wall mounting (brick and hollow walls).

Included in the package:

- // DIN rail for circuit breaker installation
- // Insulated connectors for earthing and neutral connections, with a 960°C glow wire test

Additional accessories:

- // Lock with key (optional) for added security
- // Reversible door opening – switch between left or right-hand opening without dismantling the frame

ETIBOX SB (S Box) Double insulation enclosures IP66, IK10

Enclosures made of fiberglass-reinforced polyester RAL 7035

Removable mounting plate fixed by 4 screws and pressed nuts

One enclosure includes polyester mounting plate. If necessary it is possible to order additional plate separately (as replacement)

Fixing enclosures directly on wall (surface mounted) through premade holes

Top cover sealed for high IP degree (IP66)

Attaching the top cover by four screws using a flat screwdriver

Door hinges as an option, must be ordered separately (Accessories). Recommended use of the silicone to keep IP protection degree (screw holes)

ETIBOX / Double Insulation Wall Mounted Enclosures

Description

Enclosures made of fiberglass-reinforced polyester RAL 7035, designed for extreme conditions:

- // self extinguishing 960°C , does not lead flames
- // waterproof, IP66
- // double insulation
- // halogen free
- // UV stable polycarbonate cover with gasket
- // wide temperature range -30°C / + 60 °C
- // protection against external mechanical impacts: IK10
- // easy handling & user friendly
- // suitable for PV applications, nominal voltage 1000 V DC
- // nominal current 1000A

Technical data

IP protection degree	IP 66
IK protection degree	IK10 (≤ 20 kJ)
Double insulation	□
Insulation class	II
Nominal voltage	1500V DC / 1000V AC
Installation temperature	-30°C ... +60°C
Colour	Base - grey (RAL 7035) / Lid - transparent
Flame resistance (UL 94)	Base - V0 / Lid - V2
Thermal resistance	Base - 960°C / Lid - 750°C
Standard	IEC 62208

Enclosures - transparent lid, grey base RAL 7035

Type	Code No.	Number of modules	Weight kg	Packaging pcts

ETIBOX Polyester enclosures EPC (IP66)

Anti blow system. With up to 3 or 4 points of pressure. The "wedges" press the rubber gasket at the door against the interior of the enclosure to assure IP66 protection.

NON-METALLIC hinge pins that will prevent any kind of corrosion and rust.

Mounting plates are not included in the package. Can be ordered additionally: polyester or metal.

90° locking mechanism. The standard lock can be replaced by lock with key.

Enclosure can be directly mounted on wall or additional wall fixing lugs can be used.

Possible to connect 2 or more enclosures together (grouping) by using additional connecting flanges.

Manual installation of the hinge pins, without the need for tools. Hinge bolts allow the door to open up to 180°

Closets are designed with a Shade or Cover which protects the closet from getting water inside.

Included mounting set for installation of enclosures directly on the wall (4 screws with inserts). Due to separated installation hole, IP66 is obtained.

Accessory EPC-DH-145 allows limit and lock door opening angle from 180° to 145°

2 types of passive ventilation (natural air convection) systems: EPC-VDS / VDL modules

For visual control are available cabinets with window EPC-W series.

Metric or PG cable glands can be used for IP66 cable entry.

Fiberglass Reinforced Polyester EPC Cabinets (IP66)

Description

Polyester reinforced with fiber glass enclosures provide double insulation class in IP66 protection. Can be used outside (PV systems, up to 1500VDC) or in industry applications.

- 

 // Double insulated enclosure, protection class II. Rated operational voltage 1000Vac - 1500Vdc
- 

 // Manufactured entirely without any metallic parts. WILL NOT RUST
- 

 // IP66 grade protection against water and dust; non-hygroscopic materials.
- 

 // Thermosetting materials do NOT vary in structure or get deformed with climate changes. However, plastic materials WILL get deformed.
- 

 // Possible grouping of enclosures by using IP66 connection flanges.
- 

 // Excellent cabinets for outside installation and withstanding extreme climate conditions. Rain, frost, dirt... even chemical agents. They have a much higher lifespan than metallic closets.
- 

 // All components made with recyclable materials and reduced waste. Abides by the European restrictions of hazardous residue RoHS
- 

 // High mechanical resistance IK-10
- 

 // UV stable material
- 

 // Color RAL7035
- 

 // Fire resistant at 960°, self-extinguishing material and halogen free.

Technical data

Protection degree	IP66
Degree of protection against external mechanical impacts	IK10, IK07 (with window)
Protection class	II
Rated operational voltage	1000 V AC, 1500 V DC
Material body/seal	fiberglass reinforced polyester / polyurethane
UV resistance	✓
Operating temperature	-30 °C ... +120 °C
Color	RAL 7035
Resistance to fire and heat	960 °C
Compliance with standards	IEC 62208

ETIBOX

Metal enclosures GT Type, IP66

Application :

GT-Type metal enclosures cover a wide range of applications both for industrial and civil buildings. Due to its design they provide high IP protection level, mechanical strength and functionality. They are used in places where electrical equipment is exposed to adverse effect of factors such as water, dust, mechanical impact..

Main advantages:

- // Enclosures made of high quality sheet steel thicknesses from 1.2 mm to 2 mm, resistant to external mechanical factors - IK10.
- // Specially profiled edges of the housing ensure stiffness and excellent protection against water. Poured polyurethane gasket on the door providing IP66 protection.
- // Door opening in the contour of the outer casing, which allows direct linking of several enclosures in series - a special structure hinges. The door mounting on the left or right side.

Not for external use.

Compliance with standards and directives:

- // EN 62208 Empty enclosures for low voltage switchgear and controlgear
- // EN 60529 Degrees of protection provided by enclosures (IP Code)
- // EN 62262 Degrees of protection against external mechanical impacts provided by enclosures of electrical equipment (IK code)
- // Meet the requirements of the RoHS Directive
- // Marked CE

The enclosures are supplied with:

- // Cable entry cover with mounting kit
- // Mounting plate with mounting kit
- // Door lock with, double-bit insert and key
- // Cover holes
- // Earthing set of grounding (without cable)

Free-standing cable distribution cabinets

Free-standing cable distribution cabinets KVR

The KVR are DIN size stand-alone thermosetting enclosures with a depth of 320 mm comply with a range of requirements for electrical switchgear. They are made of thermosetting glass fibre reinforced polyester which has insulating, slow-burning and self-extinguishing properties and its typical features is high resistance to weather conditions (UV). These enclosures due to its multifunctional structure can be used in power electro distribution or telecom facilities as well as general public or industry purposes.

The module design allows to connect the enclosure with the pedestal or cable base. The external surface of these enclosures is ribbed which gives them additional strength and mechanical resilience and also prevents from covering with posters. Doors and segments can be dismantled by hands without any tools. The ventilation system used in the enclosures minimises accumulation of humidity.

- // Enclosures are made of glass fibre reinforced plastic (SMC)
- // Available frames sizes 00, 0, 1, 2
- // Depth 320 mm
- // Modular construction: enclosure, base, pedestal
- // Inclined roof
- // Three-point door closing with a revolving handle and the possibility of incorporating a half-cylinder insert
- // Three-point busbar holder adjustment
- // Standard protection class IP44
- // Material resistant to UV radiation, acids, strokes, atmospheric influences
- // Colour RAL 7035
- // Accessories
- // Standards: IEC 62208:2011, IEC 61439-5:2010

Electrical parameters

Rated operational voltage Un	400V
Rated insulation voltage Ui	690V
Flamability category	V0
Degree of protection against external mechanical impacts	IK 10
Protection degree	IP44
Protection class	II
Operating temperature	-25°C ... 40°C

Technical data - Section rails for EFD

Cross section	16 mm ²	50 mm ²
Feeding at beginning/ending		
Max. current Is/Phase	80	160
Cross section of connection, mm ²	16	50
Feeding in the middle		
Max. current Ie/Phase	130	250
Cross section of connection, mm ²	35	2x50
Heat deflection temperature PVC	80°C flame resistant	
Comparative tracking index PVC	300V	
Standards	EN 60947-1:2007 / IEC 60947-1:2007	
Climate stability	DIN EN 60068	
Insulation coordination	Degree of pollution 2	
Electrical data		
Impulse voltage strength	≥4,5 kV	
Min. air distance	> 5,5 mm	
Min. creeping distance	> 5 mm	
Max. operating voltage	690 V AC/DC	
Protection class	IP20	
Short circuit rating	ICC 15kA NH 250A gL 500V	
Dielectric strenght	≥ 32 kV/mm	
Material		
	Material	Surface
Busbar	Copper	plain
Insulation	PVC lead-free	grey RAL 7035
Endcover	moulded	

Phase busbars 16mm² 80A(side connection)/130A (middle connection)

IZS50/3F/30	3 p, 30 mod.	002921265	50	1,05	2320	10	

 **ATTENTION:** To prevent electrical shock, disconnect from power source before installing or servicing.

 **Danger** Installation by electricians only

 Due to security purposes all shortened busbars need to be covered with suitable endcovers.

1.  Cut
2.  Strip
3.  Cut back copper
4.  Burr
5.  Clean
6.  Attach end cover

DIN rail distribution blocks EDB

Construction

- // Brass screw terminal blocks double-deck
- // Housing made of self extinguishing material
- // Cover and separating made of polycarbonate

Application

Proper and transparent connecting cables in low voltage distribution boards

Advantages

- // TH35 din rail mounted or on a flat surface
- // Safe and easy installation
- // Transparent cover
- // 2 or 4 pole model
- // Self extinguishing material
- // Possibility of connecting wires with ferrules or without

EDB-407

Technical data:

Degree of protection	IP20 (with closed cover)
Short circuit withstand capability Icc	20kA
Rated current	125A
In accordance with	EN 60947-1, EN 60947-1

Wire cross section by terminal size

Wire with ferrule	Wire without ferrule	Terminal size [mm]
		
1,5 - 6 mm ²	2,5 - 6 mm ²	Ø 5,3
6 - 16 mm ²	10 - 25 mm ²	Ø 7,5
10 - 16 mm ²	10 - 35 mm ²	Ø 9

Distribution blocks EDB

EDB-215

Ordering:

DIN rail distribution blocks EDBM, EDBS

Build

- // Brass or aluminum terminals
- // Wires screwed by hex key (Allen key)
- // Housing made of flame retardant material PA6 GF25

Application

- // For connecting the phase and neutral conductors in LV switchboards for proper and lucid distribution of electric energy

Advantages

- // Mounted on a TH rail or on a flat surface with screws with low head
- // Strong and simple mounting
- // Terminal material:
EDBM – MO-58 brass
EDBS – 6060 aluminum
- // Housing: PA6 GF25 fire retardant

General Specifications:

- // Rated impulse voltage withstand 6 kV
- // Rated insulation voltage 690 V
- // Number of poles 1
- // The CTI factor 600 V
- // Compliance with IEC 60947-7-1

Equipotential terminal boards ESC-QBLOK

Equipotential terminal boards

Partition rail assemblies are used as supplementary rail assemblies for phase or neutral expansion inside electrical panels. They are also known as equipotential rail assemblies because they are used as equipotential nodes in distribution control units to collect the earth system.

General features

- // Available in 7 and 12 hole versions
- // Mounted onto PR/3 profiles conforming to IEC 60715 standards, TH/35 type
- // Inherent protection against accidental contact
- // IPXXB level according to IEC 60529
- // Possible to label with a CNU/8 tag
- // Available in green and blue
- // Conformance to EN 60998-1:2004 and EN 60998-2-1:2004 regulations
- // Insulating body made of 6.6 UL94V-0 polyamide

DIN rail distribution blocks EDBJ

Build

- ▮ The blocks consist of an insert / clamp made of brass or aluminum and a housing made of plastic.
- ▮ The terminals are equipped with screws with a hex key (Allen key)

Advantages

- ▮ mounted on a TH rail
- ▮ easy to assemble
- ▮ 1 module width !!
- ▮ strong connection

Application

- ▮ For connecting the phase

and neutral conductors in LV switchboards for proper and lucid distribution of electric energy

General Specifications

- ▮ Rated impulse withstand voltage 6 kV (EDBJ-4x25-4x25, EDBJ-1x70-4x25), 12kV (EDBJ-1x35-1x35)
- ▮ Rated insulation voltage 1000 V
- ▮ Number of poles - 1
- ▮ Rated voltage 240/415 V
- ▮ Terminal material:
 - brass MO-58 (EDBJ-4x25-4x25, EDBJ-1x70-4x25)

·aluminum 6060 zinc plated (EDBJ-1x35-1x35)

- ▮ Housing material:
 - PC / ABS plastic (for EDBJ-4x25-4x25, EDBJ-1x70-4x25)
 - PA6.6 plastic (for EDBJ-1x35-1x35)
- ▮ Flammability class V0
- ▮ possibility of sealing (for EDBJ-4x25-4x25, EDBJ-1x70-4x25)
- ▮ Working temperature -30°C to +80°C
- ▮ Compliance with IEC 60947-7-1

Meter board

Instructions for mounting a meter board

- // Fasten the frame of the meter board using four screws and plastic wall inserts. While drilling holes, take care not to damage electrical wires.
- // When the board is fixed, attach a meter using bolts with sliding nuts.
- // Fasten the wires in the terminals and position the protective cover.

Universal board covering UPO

Standard length of profile
1 m

The covering UPO is the improved form for covering the space between rows of built-in elements in distribution boards. The built-in elements are installed on the mounting rails with width of 35 mm which shall be mounted in the distance of 125 mm.

Description - UPO covering consists of terminal plates that should be fixed on mounting rails, and flat and corner profiles, which are click-on mounted on the terminal plates. The space between rows of apparatuses is covered by a flat profile. Upper and lower rows of devices should be covered by corner profile.

Technical data:

Standard length of profile	1 m
Number of carriers per 1 m of profile	4 pcs
Distance between mounting rails	125 mm
Width of distance for built-in elements	46 + 0,5 mm

Mounting insulators

Rated voltage
250-3600 V

Rated impulse voltage
8-50kV

Application

Support insulators are intended for installation in el. enclosures for supporting busbars and/or other current leading parts. They provide electrical insulation. They are made of red fiber-reinforced polyester glass, which guarantees high resistance and mechanical strength. On both sides, the insulator has threaded sleeves made of galvanized steel.

Technical data

Installation temperature	-20°C ... +120°C
Material	BMC polyester halogen free
Flammability	VO (UL94)
